Professional Cold Weather Protection

Solvent-Based Silane Sealers

Silencure™ : Solvent-based, non-yellowing, acrylic co-polymer cure & seal with penetrating silane for new concrete. Low-VOC option available.

- Long-term protection from damage caused by freeze/thaw cycles & deicing chemicals
- Eliminates typical 3-step, 28-day process of curing & application of a penetrating sealer
- Meets most state DOT requirements for NCHRP-244, Series II & Series IV
- Cures broom finished concrete to ASTM C309 specifications

Penetrating Protective Silane & Siloxane

Aquanil™ Plus 40: 40% solids, solvent-based, penetrating, water-repellent, and fast drying silane treatment. Low-VOC & 100% solids options available.

- Seals pores & capillaries of concrete
- Does not alter appearance or texture of concrete
- Meets most state DOT requirements for NCHRP-244, Series II & Series IV
- Penetrates deeply for maximum protection
- Minimizes chloride ion penetration
- Provides long lasting protection

PowerSeal® 20: 20% solids, water-based, penetrating water-repellent. 40% solids option available.

- Specially formulated with a reduced evaporation rate allowing for more active ingredients to react within the substrate
- Does not alter appearance or texture of concrete
- The material's small molecular structure allows for maximum penetration into new concrete or existing concrete surface
- Extends the life of concrete

PowerSeal® SS Plus: 8% solids, water-based penetrating water repellent for concrete, masonry, & brick.

- Helps prevent efflorescence, damage from freeze/thaw cycles, and protects surfaces from destructive water & chloride salt penetration
- Formulated to minimize changes in the appearance of substrates
- Prevents spalling of concrete surfaces due to freeze/ thaw cycling
- Seals pores and capillaries of substrate preventing liquid absorption while allowing excellent vapor transmission

High Gloss Decorative Sealers

Traz™ 25: Solvent-based, non-yellowing, high-gloss film forming sealer for concrete & masonry. Low-VOC option available.

- Enhance and deepen the color of stamped concrete while shielding it from water, freeze thaw damage, dirt and most hydrocarbon chemicals
- Dustproofs as it seals
- Protect and amplify the beauty of exposed aggregate, terrazzo and man-made or natural stone
- Keeps surfaces from dusting and chalking
