Importance of Construction Zone Safety

Construction zone safety is paramount for several reasons:

1. **Worker Safety:** The primary concern in any construction zone is the safety of the workers. Construction sites can be hazardous environments with heavy machinery, elevated structures, and potential for falls or accidents.
2. **Public Safety:** Construction zones often border public roads or pedestrian areas. Proper safety measures, such as barriers, signage, and traffic control, protect motorists, pedestrians, and cyclists from hazards.
3. **Legal Compliance:** Many countries have strict regulations and standards governing construction zone safety. Compliance with these regulations is not only a legal requirement but also ensures ethical and responsible business practices.
4. **Project Efficiency:** Accidents or injuries on a construction site can lead to project delays and increased costs. Implementing safety measures helps maintain productivity by minimizing disruptions.

5. **Reputation Management:** Safety incidents can tarnish the reputation of construction companies. Demonstrating a commitment to safety not only protects lives but also enhances the company's image.
6. **Cost Savings:** Investing in safety measures may require upfront expenses, but it often results in long-term cost savings. Preventing accidents reduces medical expenses, workers' compensation claims, and potential legal liabilities.
7. **Worker Morale:** When workers feel safe on the job, their morale and productivity improve.
8. **Environmental Protection:** Construction activities can have environmental impacts, such as soil erosion, pollution, and habitat destruction.

Overall, construction zone safety is not just a legal requirement but a moral obligation to protect lives, promote efficiency, and uphold the reputation and integrity of construction companies.

THE PITCH HOPPER

MADE IN USA

Lower Pitch Side

If you flip you Pitch Hopper around you will find the lower pitched side, which is designed to give a level surface on a 9/12 pitch. This side can be used on any pitch bewlow a 9/12 as well to provide a temporary working surface.

Steep Pitch Side

The Pitch Hopper provides a temporary working surface on any pitch up to a 12/12. The steeper pitched side allows for a level surface on a 12/12, but can be used on any pitch all the way down to a 9/12.

Friction Force Foam

We make a uniquely blended foam and bind it to the wedge. The foam bottom creates a bond with asphalt shingles when weight and friction are applied. Each Pitch Hopper is rated to hold up to 250lbs. Please always wear certified safety harness while using our product.

Easy Grip Handles

Just grab your Pitch Hopper and go with effortless hand placement. Each Pitch Hopper has matching grab areas on either side. Moving your lightweight yet highly-durable wedge around the roof is easy. Our roof assistance tool weighs less than 7lb for the 32 Inch, and less than 6lbs for the 24 Inc..

Series 653 Lever Operated Hoist

The CM Series 653 Lever Operated Hoist features a short handle and minimal lever pull effort combined with high quality, rugged, steel for close quarter pulling, stretching, and hoisting applications.

- Weston type braking system.
- Simple one-handed free chaining.
- Forged upper and lower hooks with heavy cast steel latches.
- 5-year warranty against defects in material and workmanship.
- Metric rated.
- Meets ASME B30.21 - Manually Lever Operated Hoist Standard and European CE Standard.

Series 622A Chain Hoist Series

The CM Series 622-A hand chain hoist features a simple, efficient and economical design. With an ultra-low-headroom profile and lightweight steel construction, the CM 622-A is easy to install, even in confined spaces.

- Durable steel frame with heat-treated, load-bearing components.
- Forged hooks swivel 360.
- Hand wheel cover with guide slots.
- Weston-type brake stays clean and dry.
- Hardened load chain for flexibility.
- Easy to operate, units feature pull forces as low as 50 lbs.

Super Strong Anchor Shackles

CM Super Strong Shackles are carbon-type shackles with strength ratings that are up to 50% stronger than comparable-sized carbon shackles. These shackles are designed with a 6:1 safety factor. Anchor shackles can be side loaded or used for multiple connections.

- Shackles show major deformation before failure
- Manufactured from micro alloy steel for optimal strength
- Available in sizes 3⁄16" to 2½"
- Permanent markings on body indicate working load limit
- Other styles available now by special order

TCL Series lube free air hoists

TCL Series lube free air hoists are able to operate without air supply lubrication which leaves the surrounding environment free of oil mist from the air exhaust. Our TCL series hoists are recommended for use in any area where oil mist cannot be tolerated such as in food, chemical or pharmaceutical industries. These hoists feature precise load positioning with either pendant or cord control.

LB Series Lever Hoist

The LB Series of lever hoists offers a low headroom, compact design that is perfect for use in tight quarters.

- Rugged, all-steel construction that actually weighs less than comparable aluminum models.
- Grade 100 heat-treated load chain is nickel plated.
- Forged and heat-treated alloy steel hooks. Top and bottom hooks rotate 360˚.
- Weston-style load brake.
- Patented spring-loaded freewheel mechanism
- Rubber grip for non-slip operation.
- Test certificate verifies that every hoist has been factory load tested to 125% of rated capacity, in accordance with ASME B30.21 requirements.
